

L-Frame and Z-Frame

Thank You

Thank you for choosing Parke Faux Wood Shutters.

With proper installation and care, your new shutters will provide many years of beauty and performance.

Before Installing

Carefully unwrap your frames. Your frames will be labeled Left Top and Right Top, Top and Bottom. Additional fasteners may be needed on your specific mounting surface.

Tools

Pencil

Screw
Driver

Line up rout on frame piece with Hoffman key and press firmly until seated to build frame

Pre-drill holes 2" down from the top of the Side pieces

Inside Mount

Outside Mount

Pre-drill holes 2" in from each side on the Bottom Piece

Installation Instructions

Step 2

Install Frame

Secure frame to window opening using the top two screws only

Inside Mount

Outside Mount

Additional screws may be needed along the sides depending on the size of your window size

If installing the Shutter in an inside mount location, shims (not provided) may be required to accommodate an uneven surface

Step 3

Install Shutter Panel(s)

Line up your hinges on your panel with the hinges on the frame

With panel in place, insert the hinge pins provided

Close panel and inspect gaps on top and bottom

Installation Instructions

Step 4 Check for Squareness

If either gap on top or bottom of the Shutter Panel is uneven, your frame may need adjusted

Shift bottom of Frame left and right until the gap is even on top and bottom
Mark position and hold in place

Step 5 Secure Bottom of Frame

With all of the gaps even, secure the bottom of the frame with screws through the pre-drilled holes
