Re: Aerosmith Material Safety Data Sheets (MSDS)

Under the terms and specification of OSHA Regulation 1910.1200, Aerosmith Fastening Systems is exempt from the requirements of supplying MSDS's due to the fact that our tools, fasteners, and accessories are classified as "articles". The regulation defines an article as:

"a manufactured item: (i) which is formed to a specific shape or design during manufacture; (ii) which has end use function(s) dependent in whole or in part upon its shape or design during use; and (iii) which does not release, or otherwise result in exposure to, a hazardous chemical under normal conditions of use"

Thank you for your inquiry. If you have questions, please contact me.

Sincerely,

Bob Shluzas  
President
