

## Do's and Don'ts of Pneumatic Tool Use Aerosmith Fastening Systems – “CT” Tools June 2018

### Do's and Don'ts for CT Tools:

1. Oil tool daily according to Aerosmith published recommendations.:
2. Inspect magazine for damage.
3. Inspect tip assembly:
  - a. For damage
  - b. Confirm retaining clip is secure
  
1. Clearing the Occasional “Jam” of a ‘CT’ Tool:
  - i. Always disconnect tool power source (air, battery) prior to cleaning any jammed tools
  - ii. If available, always use trigger locks
  - iii. Remove all fasteners from tool feed and magazine
  - iv. Use the right tool for the right job (e.g.- proper fitting wrenches, screw drivers, etc.)
  - v. Re-assemble with clean parts & seals
2. Proper storage of tool when not in use
  - i. Always remove all fasteners from tool during storage
  - ii. Apply trigger lock
  - iii. Oil the tool.
