

## Do's and Don'ts of Pneumatic Tool Use Aerosmith Fastening Systems June 2018

### Do's and Don'ts for Low Pressure (LP) Tools:

1. Check to make sure compressor is in good running order and tanks are drained (clean and dry)
2. Make sure pressure settings are within tool specifications.
3. Inspect hose for damage: Do not use hose improperly maintained or improperly repaired.
4. Make sure to oil tool once a day
5. Make sure trigger, if selectable (sequential, rapid, bump), is set to proper setting
6. Center depth of drive to start allowing for adjustability
7. ***Adjust tool for proper length of fastener***
8. Study manual before operating tool
9. Use tool only for the purpose it was designed for
10. Do not modify tool from original design
