

Do's and Don'ts for "GT" Gas Tool Use & Maintenance Aerosmith Fastening Systems June 2018

Do's and Don'ts for Gas Tools:

1. Ensure battery is charged
2. Check to see if fuel is fresh (not out of date)
3. Check to see if fuel cell has fuel
4. Inspect fuel cell valve for damage and is secure to cell
5. Inspect magazine for damage *and fully secured!*
6. GT38LI and GT60LI specific:
 - a. Adjust depth of drive for flush drive to avoid overdriving that may cause premature wear and damage
 - b. *Make sure fuel cell is properly inserted with metering valve into fuel intake.*
 - c. Never use tools in the rain.
7. Check tool manual for further direction.
8. GT38LIEXIF and GT60LIEXIF specific:
 - a. *Make sure barrel is properly seated and locked*
 - b. Never use tool in rain
 - c. *Make sure fuel cell is properly inserted with metering valve into fuel intake.*
 - d. Check tool manual for further direction.
