

Installation Instructions Panel Drape

Thank you for choosing Lafayette's Panel Drape. With proper installation and care, your new panel drape will provide many years of beauty and performance.

Tools Needed

Power Drill, 1/4" Driver and drill bits
Tape Measure
Flat blade Screwdriver
Phillips Screwdriver
Pencil
Level

Parts List	
Screws:	1 1/2" into wall 3/4" into headrail 3" for 1" projection
Cord Cleat:	1 per standard shade 2 per TD/BU shade

Mounting Surface	Fastener
Wood	#6 Hex Head Provided 
Drywall, Plaster	Wall Anchors Not Provided 
Metal	Sheet Metal Not Provided 

Panel Width	Brackets Required
Up to 48 1/4"	5
48 3/16" - 60 1/16"	6
60 1/4" - 72 1/16"	7
72 1/4" - 84 1/16"	8
84 1/4" - 96 1/16"	9
96 1/4" - 108 1/16"	10
108 1/4" - 120"	11

BEFORE INSTALLING

- Remove shade from the package. Keep all packaging until the shade operates to your satisfaction. Contents of your hardware package may vary depending on options chosen. Additional fasteners may be needed based on your specific mounting surface.

INSTALL THE BRACKETS

Wall Bracket

- The center of the end brackets should be marked on the mounting surface 2" in from the ends of the headrail. Space remaining brackets evenly between the end brackets. Adjust placement to avoid any obstructions that may occur.

- Center a bracket over a mark on the mounting surface and making sure bracket is level and aligned, attach the bracket using the screws provided. Repeat the process for the rest of the brackets.

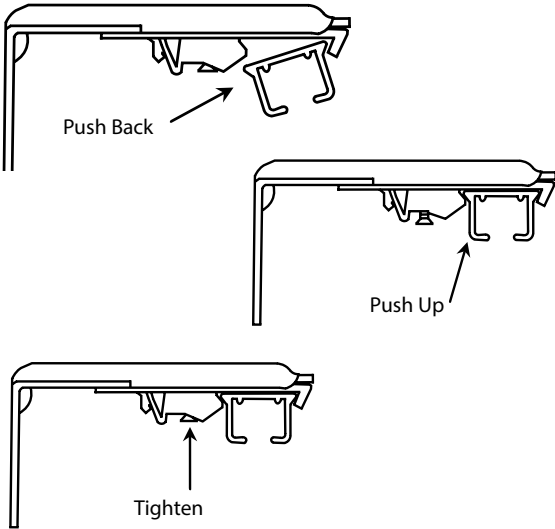

Ceiling Bracket - White and Brown

- Center a bracket over a mark on the mounting surface and drill a screw up through the hole in the bracket. DO NOT tighten the screw. Repeat the previous steps for the remaining brackets.

INSTALL THE DRAPERY ROD

Wall Bracket

- Taking the drapery rod, insert the back edge of the rod into the mounting bracket.
- Push up on the drapery rod to snap it in the front and tighten each screw on the bracket to hold the rod securely in place.

Ceiling Bracket - White

- Insert the back edge of the drapery rod into the bracket and push back.
- Push up on the front of the drapery rod. (If done correctly, you should hear the rod snap into the bracket) and tighten the screw on all brackets.

Ceiling Bracket - Brown

- Install the drapery rod by sliding the end of the rod through the brackets until each bracket is holding the rod. Make sure the rod is positioned correctly and tighten the screw on all brackets.

INSTALL THE PANEL DRAPE

Wall Bracket

- First make sure the end caps are not inserted into the ends of the drapery rod.
- Making sure that the front of the panel drape is showing, start to insert each of the carriers into the end of the drapery rod.

- For the end that has to be stationary, insert a screw stopper into the correct end of the drapery rod before you insert the final carrier.

- After inserting the final carrier, insert an end cap on the stationary side and tighten it with a screwdriver.

- Tighten the screw stopper making sure the carrier is right in between the screw stopper and the end cap screw. **Note:** If the drapery rod will not fit in all the brackets, make sure all of the brackets are level and aligned. Also make sure that the screws are loose enough on the bracket for the rod.

CARE AND CLEANING

- Light dusting is recommended for Manh Truc fabrics. Because the Manh Truc materials are "natural" and include grasses, reeds and bamboos cleaning with water or any detergent is NOT recommended. Dusting with a vacuum attachment can be done with extreme care on low suction. The lining materials for Manh Truc can be spot cleaned using warm water and detergent. Do NOT immerse the lining in water.
