

# Momenta™ Remote Control Shade App

## Features:

- Easy installation
- Extremely responsive
- Scene Operation - Automate individual window shades or shade groups using Scenes by day, time, sunrise or sunset.
  - For example, "Good Morning," where all shades raise.
  - Or "Afternoon," where shades on the east side of the house raise and shades on the west side lower.
- Intermediate stops - Set shades to lower or raise to the level you choose.
- Can be used with Auto-Lift® Parasol Cellular Shades or Tendra Sheer Shadings

Can control shades with multiple rails such as Top-Down, Top-Down/Bottom-Up, and Duo-Lucent options.

## System Requirements

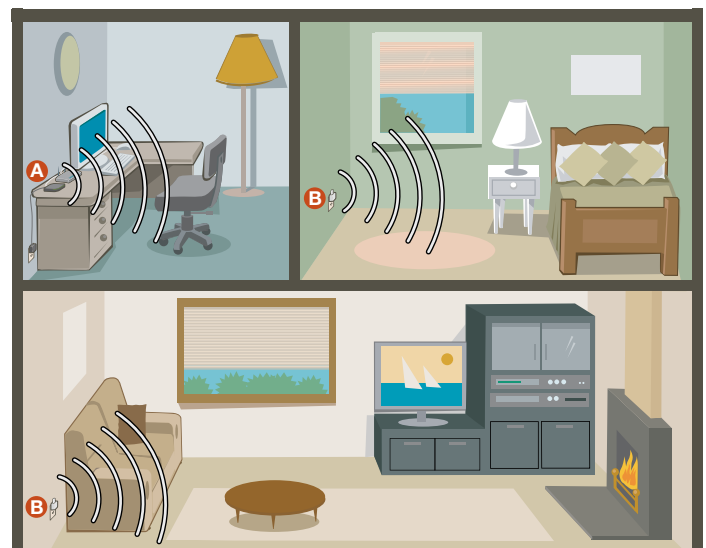

- Momenta Bridge - stores all programming data and sends signals to operate window coverings via extenders.
- Momenta Extender Kit - Kit includes a DC power supply and Momenta Extender that plugs directly into it. (Recommended to have one Extender in each room with window coverings)
- DC Power Supply (provided with Bridge kit) - Provides power to the bridge.
- DC Power Supply cable (provided with Bridge kit) - The USB cable connects the power supply to the bridge.
- Ethernet Cable - Connects the bridge to the router
- Wireless Internet Router - (Momenta App will only work correctly when connected to home network.)
- iPhone, iPad or iPod Touch - iOS 7.0 or higher
- Remote controls not necessary, but recommended

Easy set up using the Momenta App.

## Easy Installation and Set Up

- Download the Momenta Remote Control Shade App from the Apple App Store (Requires network or Internet connection.)
- Plug in wireless router
- Apply power to the Momenta Bridge using the USB power supply and cable.
- Connect Ethernet cable to Bridge and open LAN port on the wireless router.
- Plug Momenta Extender into an available outlet.
- Make sure WiFi setting on Apple device is the WiFi network to which the router is connected.
- Start the Momenta App.
