Giddy Up & Grow Update: October 2020 Updates

The south driveway is finally complete! The driveway was widened to allow for two-way traffic, and a sidewalk was added for safety.

Bricks are being laid on the exterior of the building and on the sidewalk leading into the entrance. This is where the many bricks that were purchased by families and donors will be set!

The front office and waiting room is getting close to completion! It was important to keep the “barn” feel our kiddos and families love so much—so we are putting this wood paneling in the front entrance!

The Family Viewing Area, sponsored by Indianapolis Indians Charities, is a space just off our main waiting area. Here, parents can sit at the long table to do work and watch their kiddo during hippotherapy.

The mud room is where kiddos will get all their gear on to get ready to ride their horse! We will have much more room in our new space for various sizes of helmets, pads, and other safety equipment.

Desks are being installed! No more fold out tables!
