# WORD WORM

We have created word chains in ODYSSEY using WordMasters lists 1 and 2. Create your own chain using words from **all 3 lists**. You may begin with any WordMasters word you wish, but no word can be used more than once. See how long you can make your chain! Remember, every word must be related to the word next to it. If you'd like, use your flashcards to organize your chain before you write your words.

The word chain template consists of a circular head with a smiley face and a body made of rectangular segments. The segments are arranged in a winding path: a horizontal row of four segments, a vertical segment on the right, a horizontal row of three segments, a vertical segment on the left, a horizontal row of three segments, a vertical segment on the right, and a horizontal row of three segments at the bottom.
